

CO₂-NEUTRAL SHIPMENTS

WITH CLIMATE-NEUTRAL SHIPMENTS YOU ARE MAKING
A SUSTAINABLE CONTRIBUTION TO CLIMATE PROTECTION.

CO₂-neutral Shipments

As an innovative and environmentally aware forwarding and logistics company, the VIA MAT Group of companies offers its customers the option of processing all their shipments with CO₂-neutral carriers. With climate-neutral shipments you are not only creating competitive advantages in the global marketplace, you are also making an active contribution to sustainable climate protection.

Our climate and its influence factors are not just a locally limited phenomenon, but a global concern. Therefore, to a great extent it is not important where CO₂ emissions occur or the location of where they are compensated for to create equivalent energy savings. This realization is the basis for the term climate neutrality. In response to rising customer demands for climate-protecting shipment options the VIA MAT Group of companies has expanded its service offerings.

In cooperation with our partner organization Swiss Climate we are able to process your air freight, sea freight as well as road and rail shipments carbon-neutrally. We analyze the desired shipment route and calculate the resulting CO₂ emissions. In this way the customer benefits from comprehensive advice in regards to CO₂-reducing shipment alternatives. This results in a transparent emissions calculation allocating a symbolic fee per ton CO₂ surcharge, which then flows one to one into a long-term climate project established by our environmental partner. On request, the customer receives an Environmental Certificate which confirms the climate-neutral transport.

Our Services:

- All shipment services (air freight, sea freight, road and rail shipments) can be conducted as carbon-neutral shipments
- Competent advice with regard to CO₂-reduced shipments
- Presentation of various emission-reducing shipment options
- Analysis and calculation of CO₂ emissions per desired transit route
- Issue of an environmental certificate for carbon-neutral shipments

Our Strengths – Your Benefits:

- Cooperation with the environmental organization Swiss Climate
- Sustainable climate protection is part of our corporate philosophy
- Win-win situation for the environment and for the customer
- Customized service offerings
- Transparency in CO₂ calculations
- Environmental certificate for climate-neutral shipments
